8:30am -	Carole Goble: Results Vary: The Pragmatics of Reproducibility and Research Object Frameworks			
10:00am	Location: Salon A-F			
	Chair: Thomas Finholt , University of Michigan			
	<p>Carole Goble is a Professor in the School of Computer Science, at the University of Manchester in the UK. She leads a large team of researchers and developers working in e-Science, building e-infrastructure for researchers working at the lab, national, and pan-national level. She is heavily involved in European cyberinfrastructures for the Life Sciences and is currently active in linking these with the NIH BD2K Commons initiative. She applies technical advances in knowledge technologies, distributed computing, workflows and social computing to solve information management problems for Life Scientists, especially Systems Biology, and other scientific disciplines, including Biodiversity, Chemistry, Health informatics and Astronomy. Her current research interests are in reproducible research, asset curation and preservation, semantic interoperability, knowledge exchange between scientists and new models of scholarly communication. She has recently been advocating the releasing of research as Research Objects (www.researchobject.org) and is a long-established leading figure in the Semantic Web and Linked Data, chairing the International Semantic Web Conference in 2014 and co-founding the leading journal in the field.</p> <p>Goble serves on numerous committees, including advisory boards for Force11 and Software Carpentry, and is a State appointee to the UK's Biotechnology and Biological Sciences Research Council. At a local level she chairs her institution's Academic advisory committees for the institutional repository and Research Data Management. In 2008 she was awarded the Microsoft Jim Gray award for outstanding contributions to e-Science and in 2010 was elected a Fellow of the UK's Royal Academy of Engineering. In 2014 she was appointed Commander of the Order of the British Empire for her Services to Science.</p>
