

GRADUATE PROGRAMS

DREXEL UNIVERSITY

College of

Computing & Informatics

GRADUATE PROGRAMS

MASTER OF SCIENCE PROGRAMS

Artificial Intelligence & Machine Learning *(New for Fall 2020)*

Provides a comprehensive understanding of a range of theoretical and applied AI and machine learning topics and algorithms.

Computer Science

Offers a multidisciplinary and in-depth understanding of the core and advanced topics in computer science.

Data Science

Equips students with both the computational and applied knowledge necessary to thrive in the fast-growing, interdisciplinary field of data analytics.

Health Informatics

Educates students from diverse backgrounds on how to use information technology efficiently and responsibly to improve health outcomes.

Information

Features majors in Library & Information Science (ALA-accredited), Digital Content Management, and Human-Computer Interaction & UX.

Information Systems

Designed for professionals serious about broadening their knowledge in information systems and technology.

Software Engineering

Prepares students to become professional software engineers across a wide variety of industries.

Cybersecurity*

Provides deeply technical and specialized training to develop professionals that are able to understand, adapt, and develop new techniques to confront emerging threats in cybersecurity. **A joint program with Drexel's College of Engineering*

GRADUATE MINORS

- **Applied Data Science**
- **Computational Data Science**
- **Computer Science**
- **Digital Content Management**
- **Healthcare Informatics**
- **Human-Computer Interaction and User Experience**

DOCTORAL PROGRAMS

Computer Science

Prepares post-graduate students for leadership careers in research and education in computer science and interdisciplinary work using computer science.

Information Science

Prepares students to become creative, interdisciplinary researchers with foundations in information science, data science and human-centered computing.
